

Dear users,

If you are using Apple iPhone or iPad, you can download the Solmeta GMAX Bluetooth Remoter APP from APPLE Store. The APP named "G-Remoter" Ver 1.0.0 is free.

The APP "G-Remoter" just work with Solmeta Geotagger GPS "GMAX" (for Nikon cameras) or "GMAX-EOS2" (for Canon cameras), but can not work with "GMAX-EOS" because this model has not bluetooth function. But we just support Bluetooth Ver 4.0 standard or above, so the iPhone 4S and later are OK.
